

Generated electronically from XtroEngine.

Delivery is a beginning, not an end — we keep the system healthy with maintenance plans.

6. Maintenance & support

We plan the launch together and leave documentation and training.

5. Launch & handover

Before launch we check functionality, performance, security and accessibility.

4. Testing & quality

We ship visible output at regular intervals and adjust direction together via feedback.

3. Design & development

We present scope, timeline and budget transparently — clear line items, not vague "contact us".

2. Proposal & planning

We clarify your needs, goals and current state — no solution before the right questions.

1. Discovery

step-by-step approach.

We dislike surprises. Every project runs on a documented, predictable method. Here is our
